DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I: Fig. 1 –14 – An optical fiber cleaving device with a thin plate member attached to cover.

Species II: Fig. 15a & 15b – An optical fiber cleaving device with a thin plate member attached to fiber holder.

Species III: Fig. 16, 17, 18 a & b, 19 a & b - An optical fiber cleaving device with a piece member movably attached to cover.

Species IV: Fig. 20,21,22,23 a& b - An optical fiber cleaving device with a disc member rotatably attached to cover section.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species I: Claim 2 - An optical fiber cleaving device with a thin plate member attached to cover section.

Species II: Claim 3 - An optical fiber cleaving device with a thin plate member attached to fiber holder.

Species III: Claim 4 - An optical fiber cleaving device with a piece member movably attached to cover section.

Species IV: Claims 5 and 6 - An optical fiber cleaving device with a disc member rotatably attached to cover section.

The following claim(s) are generic: Claim 1.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features as set forth above.
